

ISTANBUL / OCTOBER 2025 / FOR IMMEDIATE RELEASE

RMK Yachts presents the reimagined Orca 58 superyacht project

- Hull of the 58-meter Orca completed, project available for sale
- 24-month delivery from contract signing
- Most voluminous yacht in class at 1,000 GT
- Bold new design by Lagaria Yacht Design & Architecture
- Steel-built, 5,000 nm range

RMK Yachts announces the rebirth of the **Orca 58**, a visionary superyacht project that merges heritage with innovation.

With an extraordinary 12-meter beam and an approximate volume of 1,000 GT, the 58-meter Orca 58 stands among the most voluminous yachts in her class. In fact, she's around 30% larger than other boats of this length. Her generous dimensions deliver the openness, comfort, and flexibility that today's owners seek, particularly in the U.S. market, where space and customization define modern luxury.

Originally conceived several years ago, the Orca 58 began as a technically advanced hull built to RMK's exacting standards — a foundation of strength, precision, and potential. Now, the shipyard has reimagined the project in collaboration with Lagaria Yacht Design & Architecture, giving rise to a bold new yacht that embodies the spirit of reinvention.

*"We saw great potential in the original hull, a structure built with precision and integrity," says **Cüneyt Okcu, Director of RMK Yachts**. "Rather than starting from scratch, we decided to honor that foundation and transform it into a new expression of our design philosophy, engineering capability, and vision for the future."*

With her hull already completed, the Orca 58 offers a delivery timeline of just 24 months from contract, a rare advantage compared to fully new builds. This makes her an exceptional opportunity for buyers seeking a fast-tracked custom superyacht experience without compromise.

A legacy reborn

The rebirth of Orca 58 reflects RMK Yachts' commitment to innovation through respect for craftsmanship. The new design by Lagaria Yacht Design & Architecture infuses a fresh, contemporary identity into the proven engineering platform. The result is a superyacht that blends timeless naval architecture with a strikingly modern aesthetic, crisp lines, sculpted surfaces, and a silhouette that quietly commands attention.

From bow to stern, Orca 58 conveys a sense of balance between strength and elegance. Expansive glazing invites natural light deep into the interior, creating seamless transitions between indoor and

outdoor spaces. Her cascading aft terraces and bold superstructure geometry form a design that is both functional and poetic. It's a true reflection of RMK's artistry.

Her steel hull and superstructure ensure robust performance and long-term durability, while the wide beam provides the platform for expansive guest and crew areas. She accommodates 12 guests in six staterooms and 13 crew, offering exceptional privacy and service capability.

Distinctive design and living at sea

Every line of Orca 58 speaks to purpose. The aft decks cascade toward the sea in a sequence of terraces, integrating a flush 6x3-meter pool and fold-down bulwarks that expand into a generous beach club environment. From alfresco dining to water-level lounging, each deck is designed for adaptable, year-round use.

The yacht's contemporary yet timeless profile allows her to feel equally at home in St. Tropez, South Florida, or the Maldives. Multiple outdoor zones across her decks ensure both privacy and variety, while her wide interiors can host bespoke features such as a gym, sky lounge, cinema, or spa. Everything on board will be tailored to her future owner's vision.

Orca 58 is currently for sale and represented in the United States by United Yacht Sales brokers.
